Concrete Pipe and Precast
Association of Australasia

MEMBERSHIP INFORMATION

RESILIENCE • STRENGTH • DURABILITY • SUSTAINABILITY

Concrete Pipe and Precast
Association of Australasia

WHAT WE STAND FOR

The Concrete Pipe & Precast Association of Australasia (CPPAA) is a not-for-profit association, representing manufacturers of concrete pipe, box culverts, and other associated precast concrete products, and suppliers to the industry in Australia and New Zealand.

As the leading voice for concrete pipe and associated products in Australia and New Zealand, we advocate for appropriate specification, installation and adoption of members products to ensure resilient, sustainable, durable multi-generational civil infrastructure assets.

WHAT WE STRIVE TO DO

Provide value to the industry by:

- ensuring that within the industry, pipe, and any associated product, is selected, designed and installed in the correct manner
- providing an industry access point for technical information
- providing one industry voice to government, statutory authorities and specifiers

Provide value to the members of the Association by:

- creating and promoting the value of CPPAA membership
- promoting appropriate design, specification and installation of products in accordance with the most up to date and relevant Australian and New Zealand Standards
- promoting the features and benefits of concrete pipe and associated precast products and drive the technically correct analysis, design, materials specification, standards setting, product selection and installation practices
- promoting growth opportunities for the Industry as a whole

INDUSTRY LEADERSHIP

- Nominating organisation to Standards Australia
- Representatives on Standards Technical Committees
- Maintain trusted expertise around manufacture, design, installation and resilience of concrete pipe and underground civil precast
- Industry supported pipe design software
- Technical research to support the continued growth of the industry
- Provide training and education to industry participation in working groups and committees with affiliated industry bodies
- Collaboration with international associations with a similar focus
- WE serve as a resource for industry to navigate complex issues

Concrete Pipe and Precast
Association of Australasia

ORGANISATIONAL STRUCTURE

In keeping with its vision and strategy and to support the objectives, the Association has in place a full-time Executive Director and 'as-required' administrative support.

It is active at four levels:

- Council
- Executive Director
- Management Committee
- Project Working Groups

Each level plays an integral role in executing the Association's objectives.

Council:
The CPPAA Council sets policy guidelines for the Association and agrees on action plans to be implemented by the Management Committee, as well as dealing with issues that affect the members in accordance with the mission and objectives.

Management Committee:
The Management Committee is responsible for the development and implementation of the CPPAA action plans. The Management Committee is made up of a balanced mix of senior personnel from member organisations who work with the Executive Director to ensure that action plans are followed through.

Project Working Groups: Working groups, made up of participants with relevant expertise from member companies and suppliers, focus on delivering a particular strategic imperative.

Association of Australasia

TOGETHER WE ARE A STRONGER VOICE

MEMBERSHIP

Becoming a member of CPPAA gives access to expert guidance and support from the team on a variety of issues including technical knowledge, specifications, environment, sustainability and legislation. Membership also enables members to raise their company's profile through the networking opportunities provided through events, meetings, seminars and participation in working group activities and representation on standards committees.

Full Membership
is available to producers of steel reinforced concrete pipes and associated products with manufacturing facilities in Australasia.

Affiliate Membership
is offered to producers of associated products with manufacturing facilities in Australasia.

Associate Membership
is offered to companies and organisations involved in the industry supply chain.

MEMBERSHIP BENEFITS
